

FIG. 1 is a perspective view of a diamond-shaped frame assembly. The assembly includes a central diamond-shaped frame (10) with four elongated members (12, 14, 16, 18) meeting at four vertices (20, 22, 24, 26). Each vertex is reinforced with a cross-hatched structure (28, 30, 32, 34). Two circular components (40, 42) are positioned within the frame. Each circular component has a central hub (44) with a central opening (46) and a surrounding ring (48). The circular components are connected to the frame members by a series of small, rectangular elements (50, 52, 54, 56). The entire assembly is shown in a perspective view, with the diamond shape oriented diagonally.
